Internet References

Last updated: 14th July 2022
* = Updated 14th July 2022
** = Updated 4th January 2021

The internet raises more difficulties compared to the other references collected since there are more decisions about what to include - and exclude. The following selection of references often reflects my choices about which papers, chapters, books, etc relate to my interest in ICTs in everyday life. Hence, they usually report empirical research, often relating the offline and online. More recently I have started to add more material that reflects online experiences such as those on social networking sites since I have started to do work in this area. The children and the Internet references also reflect my involvement in the projects EU Kids Online and Toddlers and Tablets. The 'digital divide'/social exclusion references are in a separate list on my website.
