# Introduction

This document provides detailed information on installation procedure and detailed functionalities of the Fuji Xerox **Connect to:** Installer (v1.0) for SharePoint Online.

## Overview

The Fuji Xerox **Connect to:** Installer (v1.0) for SharePoint Online is designed to be an all-purpose application that helps in discovering compatible Fuji Xerox multifunction devices (MFDs) on the network and then installing, uninstalling and upgrading **Connect to:** plug-ins on the MFDs. The installer also works as a single point to manage the number of MFDs, maintain version control of plug-ins and apply licensing to the installed plug-ins.

After installing or updating the **Connect to:** plug-ins successfully on the MFD through **Connect to:** Installer for SharePoint Online, users can use it on the MFD.

## Help Desk

If you require further assistance, please contact Fuji Xerox Australia Customer Support Centre on:  
**1800 028 962**

## Prerequisites for **Connect to:** for SharePoint Online

Microsoft .NET Framework 4.0 must be installed on the machine on which the **Connect to:** for SharePoint Online runs.

The application can run on the following Operating Systems:

- Windows Server 2003 (32/64 bit)
- Windows Server 2008 (32/64 bit)
- Windows Server 2008 R2
- Windows Vista (32/64 bit)
- Windows 7 (32/64 bit)
- Windows 8 (32/64 bit)

The application requires the Fuji Xerox MFDs to have SSMI version 1.17.2 or higher installed on them and XCP plug-in kit version 1.3.1 or higher enabled.

- Following is the list of Fuji Xerox MFDs on which the application can run:
  - ApeosPort IV 2275/3373/3375/4475/5575
  - ApeosPort IV 6080/7080
  - ApeosPort V C3373 (T2)/C3375 (T2)/C4475 (T2)/C5575 (T2)/C6675 (T2)/C7775 (T2)
  - ApeosPort V C5580 (T2)/C6680 (T2)/C7780 (T2)

<b>Note:</b> The installer does not work on <i>DocuCentre</i> .
---

For information on how to configure **Connect to:** for SharePoint Online shortcut on MFD All Services screen, refer to [Appendix A](#). For information on how to check SSMI version, refer to [Appendix B](#). For information on how to check if XCP plug-in is enabled or not, refer to [Appendix C](#). For information on how to change the log file path, refer to [Appendix D](#).

# How to Install **Connect to: Installer for SharePoint Online**

To install **Connect to: Installer for SharePoint Online**:

1. Right-click the **Connect to for SharePoint Online.exe** and select **Run as administrator**.

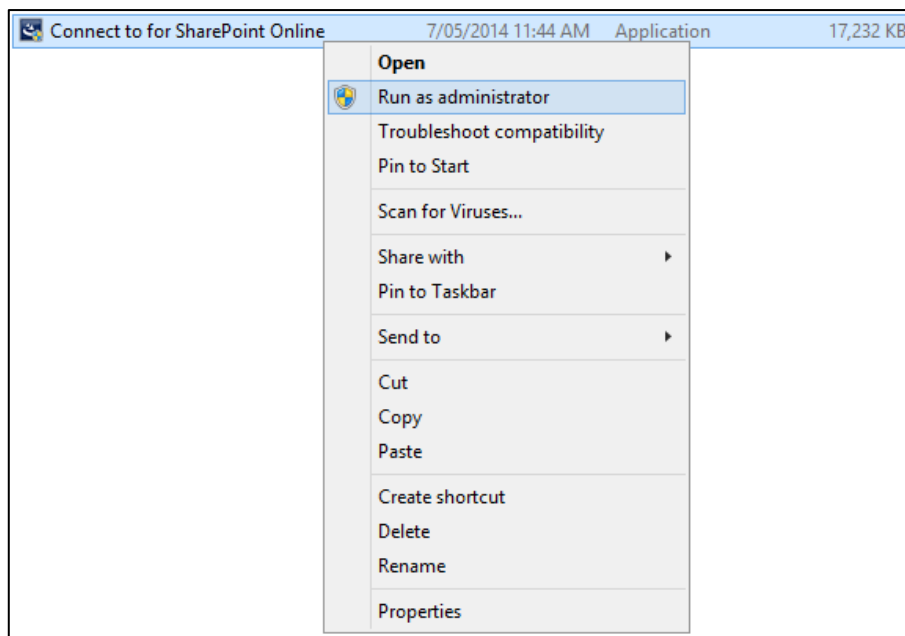

Figure 1

The *InstallShield Wizard* screen is displayed.

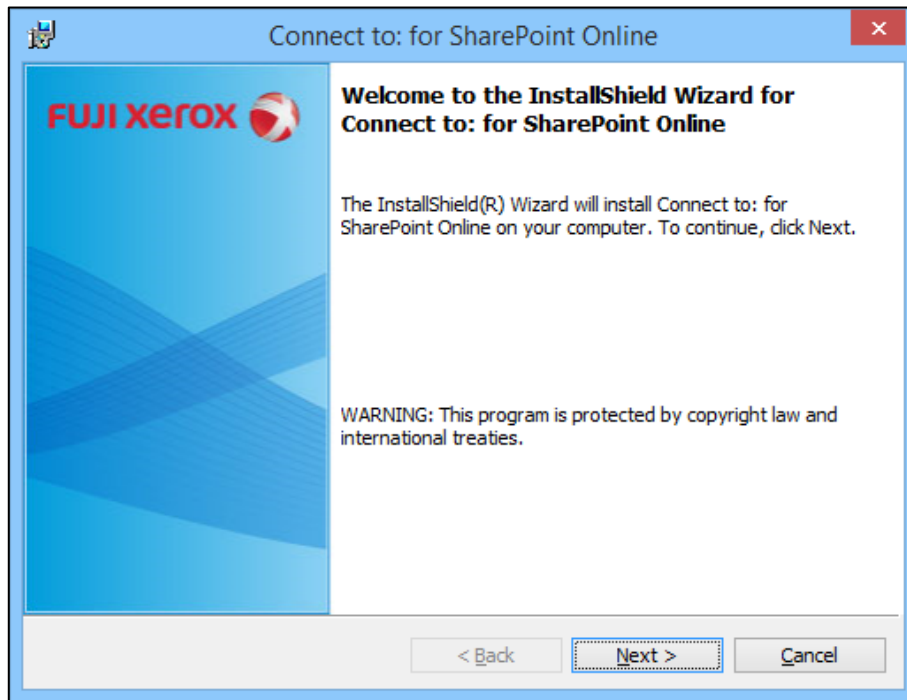

Figure 2

2. Click **Next**.

The *Licence Agreement* screen is displayed.

3. Select **I accept the terms in the licence agreement** and click **Next**.

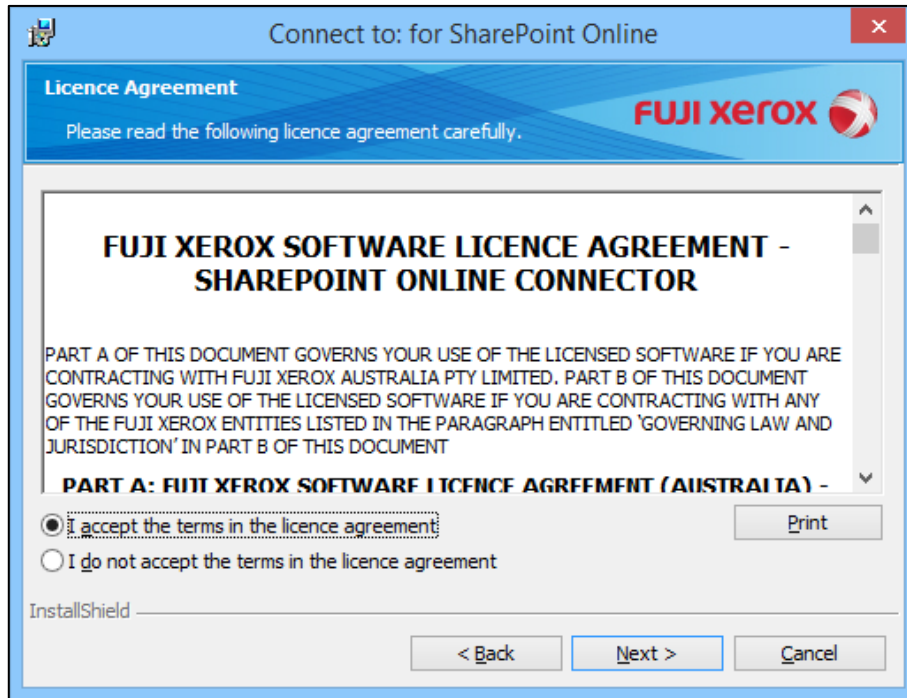

Figure 3

The following screen is displayed:

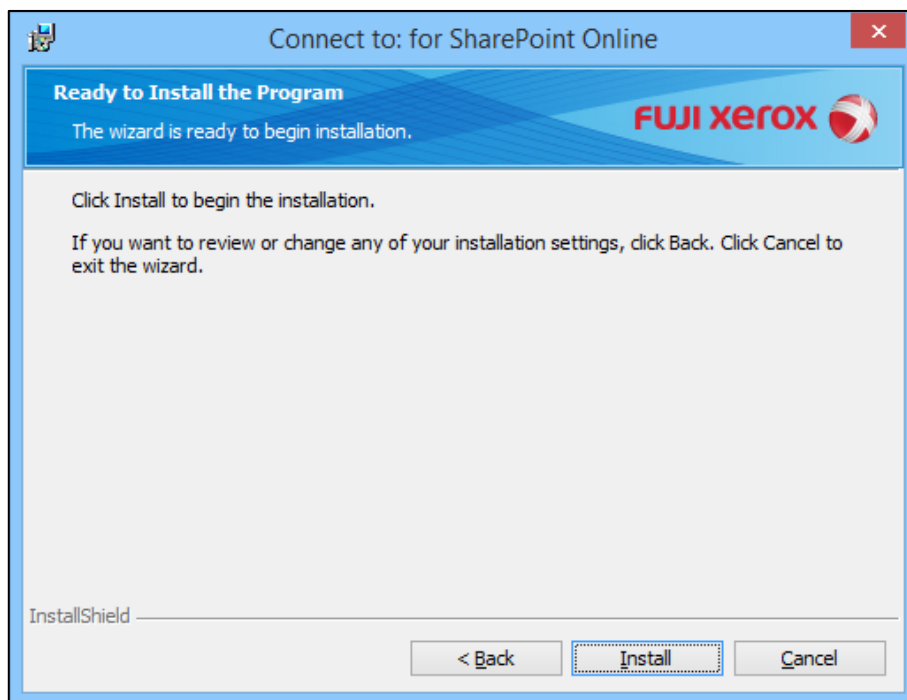

Figure 4

4. Click **Install** to begin the installation.

The *InstallShield Wizard Completed* screen is displayed.

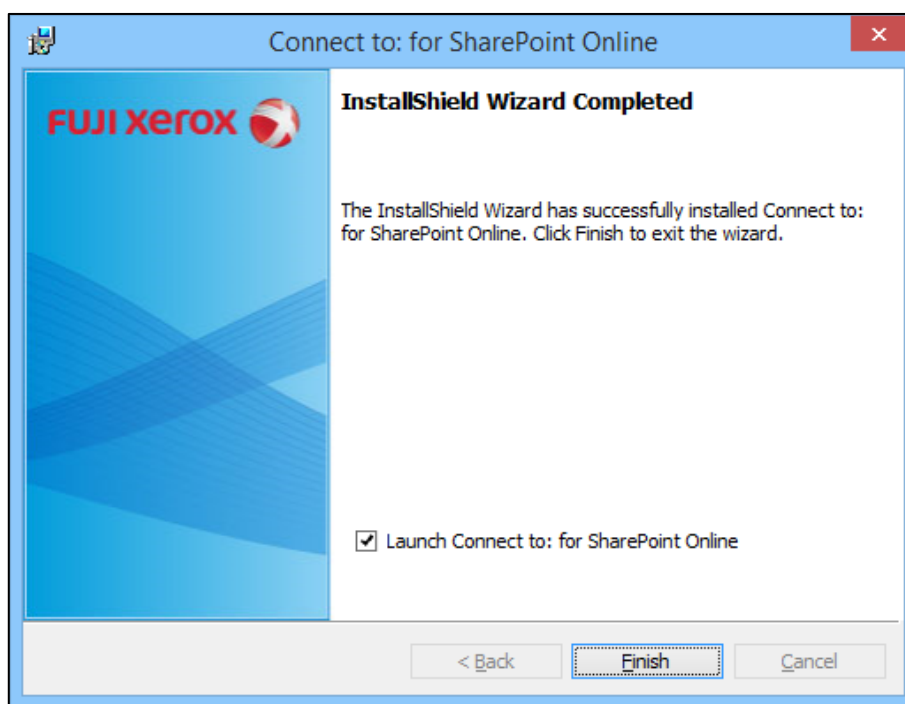

Figure 5

5. Click **Finish** to exit the wizard.

# User Help for **Connect to: Installer for SharePoint Online**

This section provides information on the following topics:

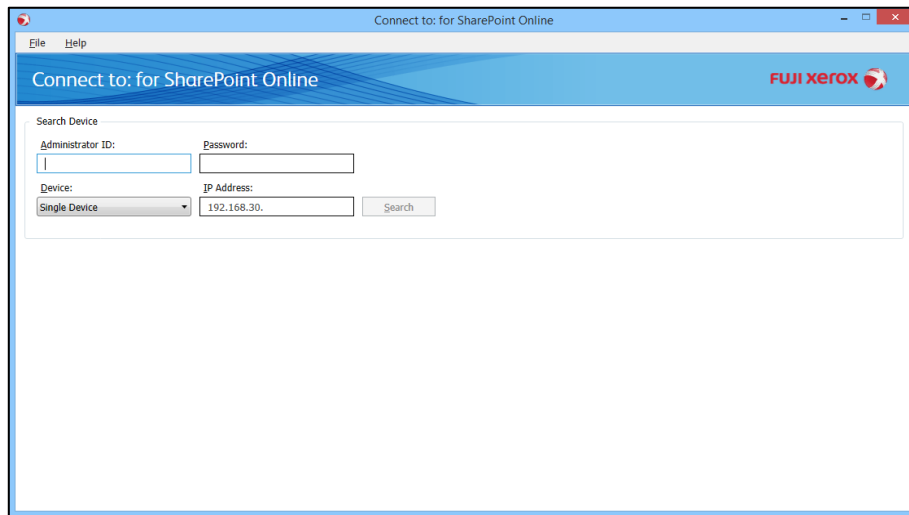

- [How to Discover MFDs](#)
- [How to Install Plug-ins on MFDs](#)
- [How to Uninstall Plug-ins from MFDs](#)
- [How to Upgrade Plug-ins on MFDs](#)
- [How to Apply Licence for Plug-ins](#)
- [How to Repair Plug-ins on MFDs](#)
- [Troubleshooting](#)

# How to Discover MFDs

This section describes the user interface of the **Connect to:** Installer for SharePoint Online and explains how to search MFDs.

To search MFDs:

1. Type the common device Admin credentials (**Administrator ID** and **Password**) in the corresponding fields displayed on the **Connect to:** Installer for SharePoint Online home page:

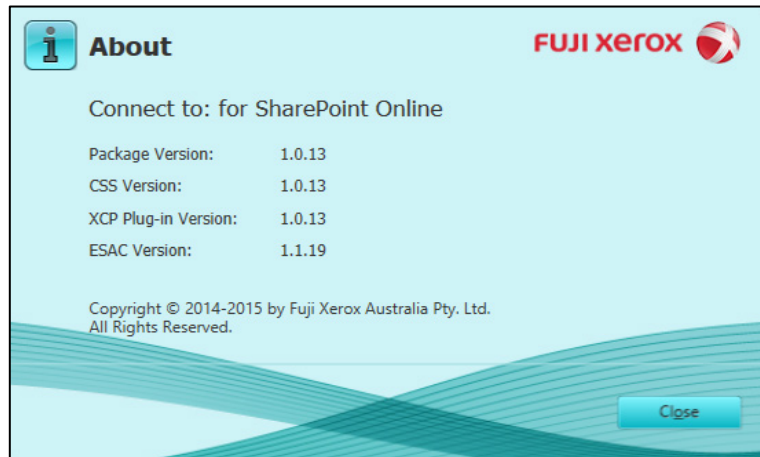

The screenshot shows a software window titled "Connect to: for SharePoint Online". The window has a blue header bar with the title and the "FUJI xerox" logo. Below the header, there is a section titled "Search Device". This section contains four input fields: "Administrator ID:", "Password:", "Device:", and "IP Address:". The "Device:" field is a dropdown menu currently showing "Single Device". The "IP Address:" field contains the text "192.168.30.". To the right of the "IP Address:" field is a "Search" button.

Figure 6

**Note:**

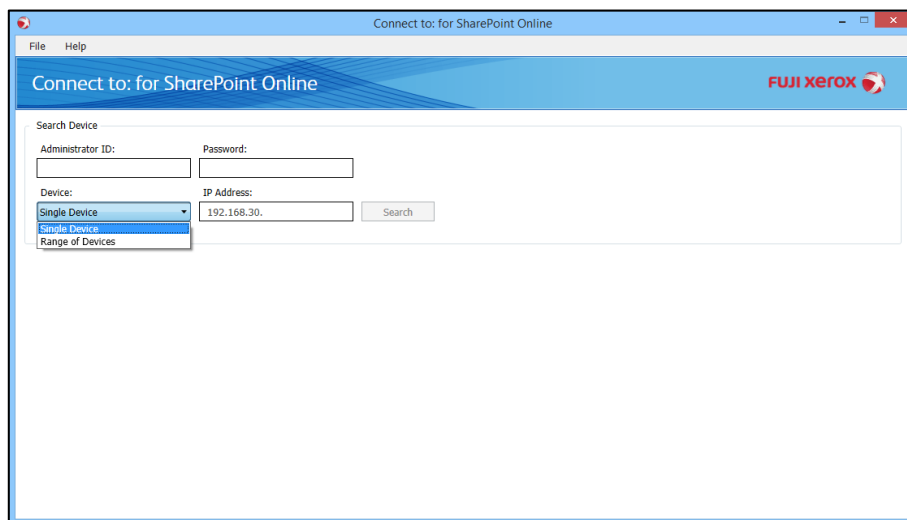

- Click **File > Exit** to exit the application.
- Click **Help > View Help** to access the *Fuji Xerox Connect to: Installer for SharePoint Online help*. Alternatively, you can press **F1** to access the help.
- Click **Help > About** to view the following screen with version details:

**Figure 7**

When required, please share the **Package Version** details with the Fuji Xerox Australia Customer Support Centre.

2. Select the appropriate search criteria from the dropdown list as shown in the screenshot below:

**Figure 8**

You have the following two search options available for device discovery:

- Single Device
- Range of Devices

## Single Device search

To start Single Device search:

1. Select **Single Device** from the *Device* dropdown list.

**Note:** **Single Device** is the default selection in the *Device* dropdown list.

2. Type the IP address in the **IP Address** field and click **Search**:

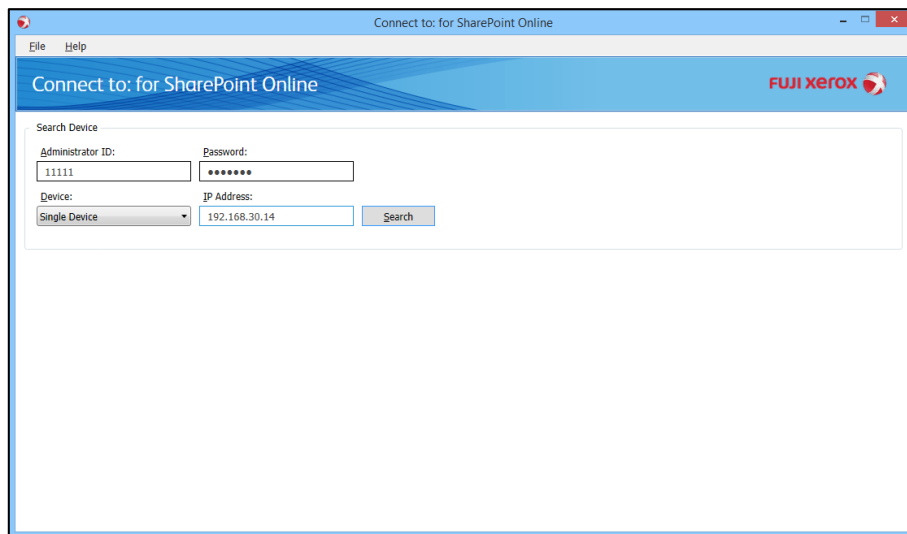

Figure 9

**Note:** The first three parts of the IP address is auto-populated with the IP address of the machine on which the Installer runs.

The following device search progress screen is displayed:

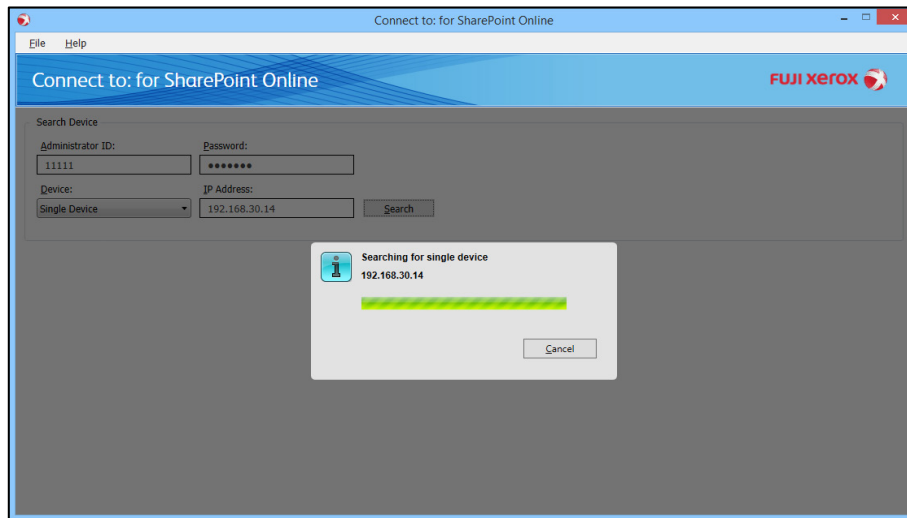

Figure 10

**Note:** Click **Cancel** on the device discovery search screen if you want to stop the search.

After the search is complete, the following screen with MFD details is displayed:

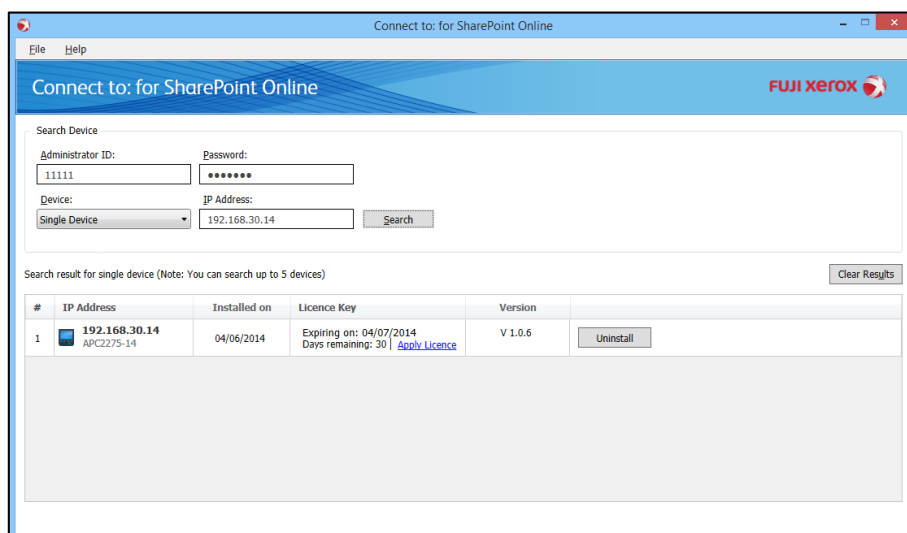

Figure 11

**Note:**

- If no device is found, then a message *Device not found* is displayed.
- If no compatible device is found, then a message *Compatible device(s) not found* is displayed.

- If a user provides wrong credentials for an MFD, the IP Address and the **Install** button are displayed, and either of the following two messages are updated in the log files:

- **Invalid MFD username or password**
- **System is Locked**

*[This note is also applicable for the [Range of Devices search](#) section.]*

The search results display the following data in different columns:

- **IP Address:** Displays the IP address of the device. The hostname is also displayed under the IP address.
- **Installed On:** Displays the date on which the plug-in is installed
- **Version:** Displays the version details of the installed plug-in.
- **Licence Key:** Displays the expiry date of the trial licence and the exact number of days remaining before its expiry. Also displays the **Apply Licence** link whenever applicable.

## Range of Devices search

To search multiple devices within a specific range of IP addresses:

1. Select **Range of Devices** from the *Device* dropdown list.
2. Type the start range of the IP address in the **From IP Address:** field and end range of the IP address in the **To IP Address:** field and click **Search**.

**Figure 12**

**Note:** The first three parts of the IP address in both the fields are auto-populated with the IP address of the machine on which the Installer runs.

The following device search progress screen is displayed:

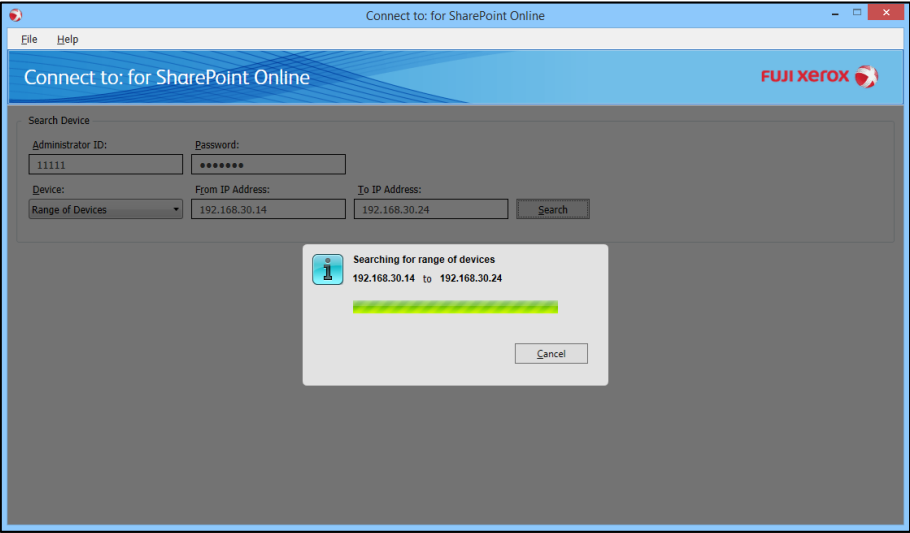

Figure 13

**Note:** Click **Cancel** on the device discovery search screen if you want to stop the search.

After the search is complete, the following screen with device details is displayed:

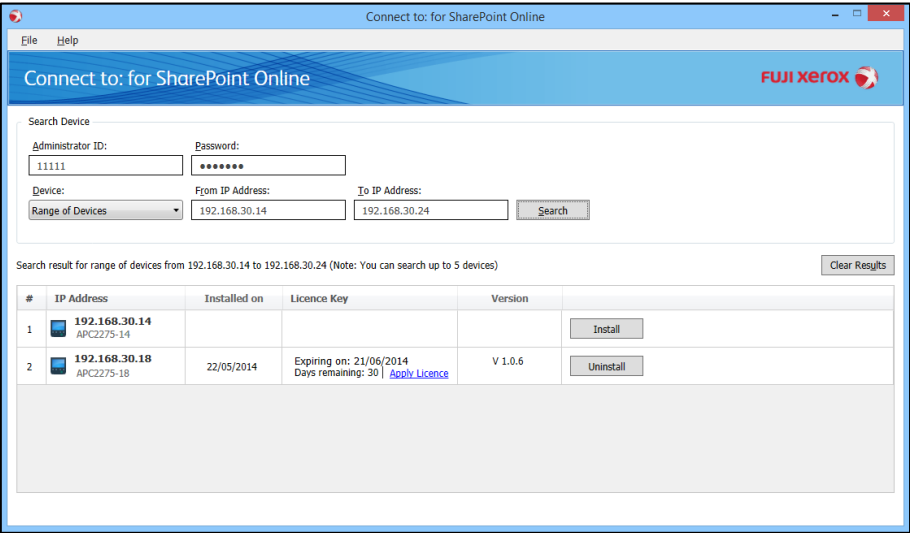

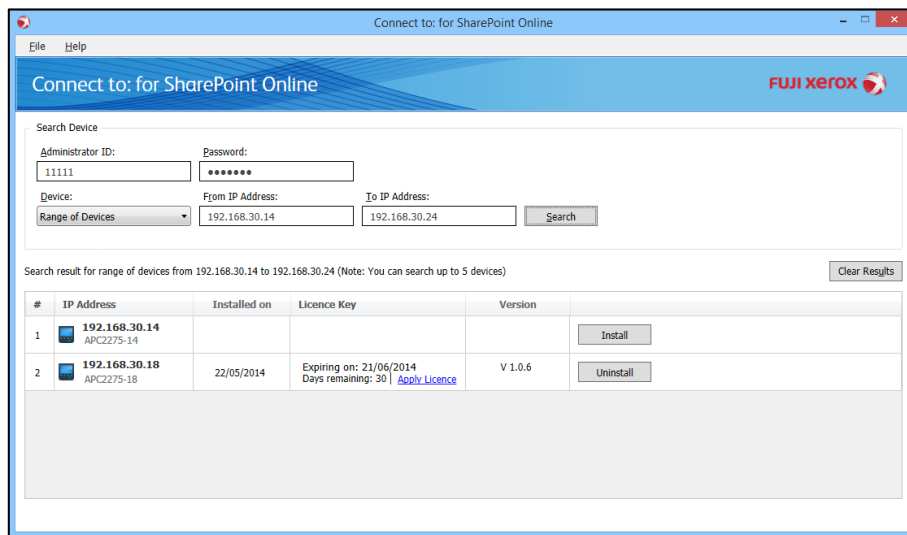

Figure 14

# How to Install Plug-ins on MFDs

To install plug-ins and CSS files on an MFD:

1. Search the MFDs on which you want to install the plug-in and CSS file, using the procedures explained in [How to Discover MFDs](#).

The search results are displayed:

The screenshot shows a web application window titled "Connect to: for SharePoint Online" with a Fuji Xerox logo. It features a search interface with fields for Administrator ID (11111), Password (masked), Device (Range of Devices), From IP Address (192.168.30.14), and To IP Address (192.168.30.24). A "Search" button is present. Below the search fields, a message states: "Search result for range of devices from 192.168.30.14 to 192.168.30.24 (Note: You can search up to 5 devices)". A "Clear Results" button is also visible. The search results are displayed in a table with columns: #, IP Address, Installed on, Licence Key, Version, and an action button.

#	IP Address	Installed on	Licence Key	Version	
1	192.168.30.14 APC2275-14				Install
2	192.168.30.18 APC2275-18	22/05/2014	Expiring on: 21/06/2014 Days remaining: 30   <a href="#">Apply Licence</a>	V 1.0.6	Uninstall

Figure 15

**Note:** The **Install** button is displayed only for those devices on which the plug-in and CSS file are yet to be installed.

2. Click **Install** to install the plug-in and CSS file on the corresponding device.

**Note 1:** If you force close the application (by clicking the **X** button at the top-right corner of the screen) at any point of time during *installing*, *uninstalling* or *upgrading* the plug-ins, the following screen with a warning message is displayed. Clicking **Yes** may leave the MFD in error state.

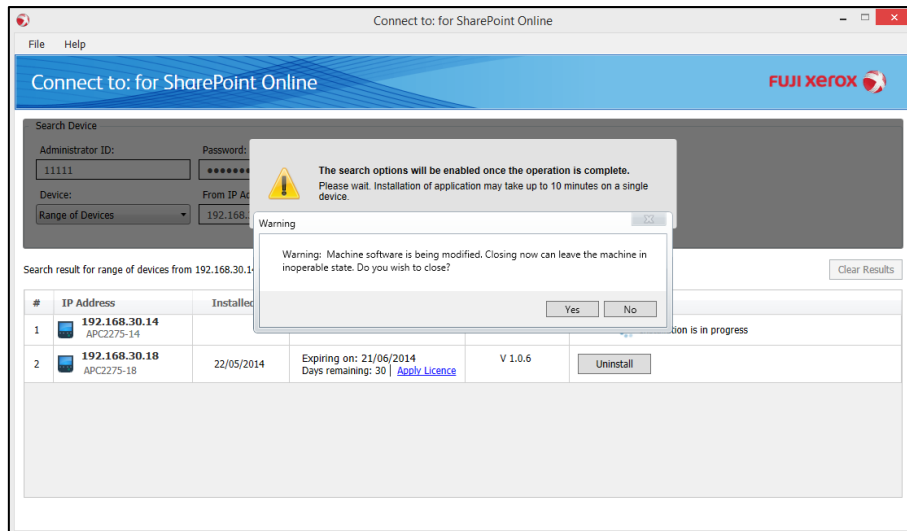

Figure 16

**Note 2:** While installing, uninstalling, upgrading or repairing the plug-ins, if either the device is simultaneously in operation by a different user or there is movement in front of the device, causing it to wake up from power save mode, the following error message displayed on the screen:

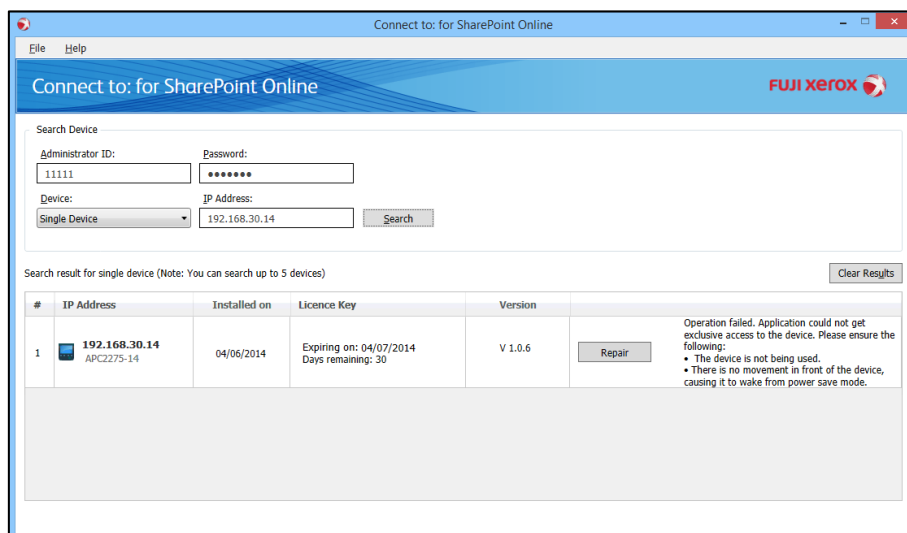

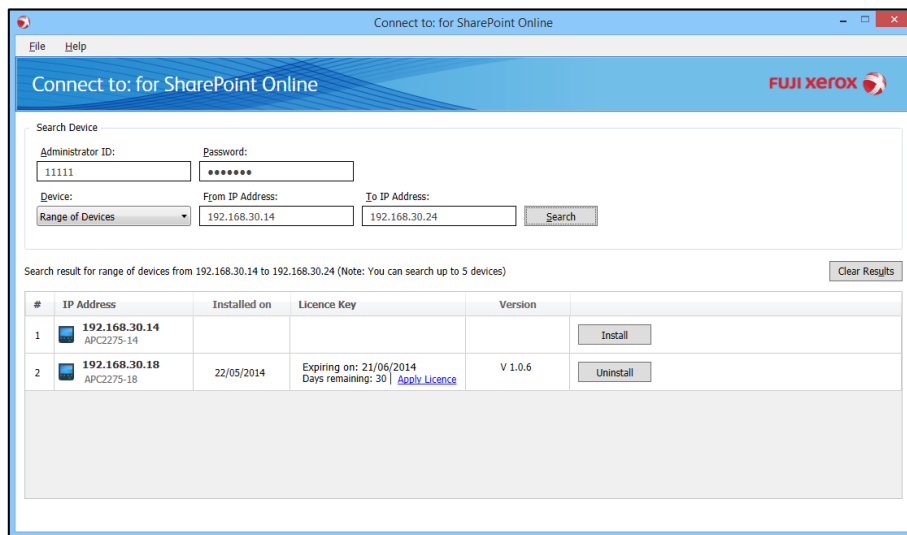

Figure 17

# How to Uninstall Plug-ins from MFDs

To uninstall plug-ins and CSS files on an MFD:

1. Search the MFDs from which you want to uninstall the plug-ins and CSS files, using the procedures explained in [How to Discover MFDs](#).

The search results are displayed:

The screenshot shows a web application window titled "Connect to: for SharePoint Online" with a Fuji Xerox logo. It features a "Search Device" section with fields for "Administrator ID:" (containing "11111"), "Password:" (masked with dots), "Device:" (a dropdown menu set to "Range of Devices"), "From IP Address:" (containing "192.168.30.14"), and "To IP Address:" (containing "192.168.30.24"). A "Search" button is located to the right of these fields. Below the search section, a message states: "Search result for range of devices from 192.168.30.14 to 192.168.30.24 (Note: You can search up to 5 devices)". A "Clear Results" button is on the right. A table displays the search results:

#	IP Address	Installed on	Licence Key	Version	
1	192.168.30.14 APC2275-14				Install
2	192.168.30.18 APC2275-18	22/05/2014	Expiring on: 21/06/2014 Days remaining: 30   <a href="#">Apply Licence</a>	V 1.0.6	Uninstall

Figure 18

**Note:** The **Uninstall** button is displayed only for those devices on which the plug-in and CSS file have already been installed.

2. Click **Uninstall** to uninstall the plug-in and CSS file from the corresponding device.

# How to Upgrade Plug-ins on MFDs

To upgrade the plug-ins and CSS files on an MFD:

1. Search the MFDs on which you want to upgrade the plug-in or CSS file, using the procedures explained in [How to Discover MFDs](#).

The search results are displayed:

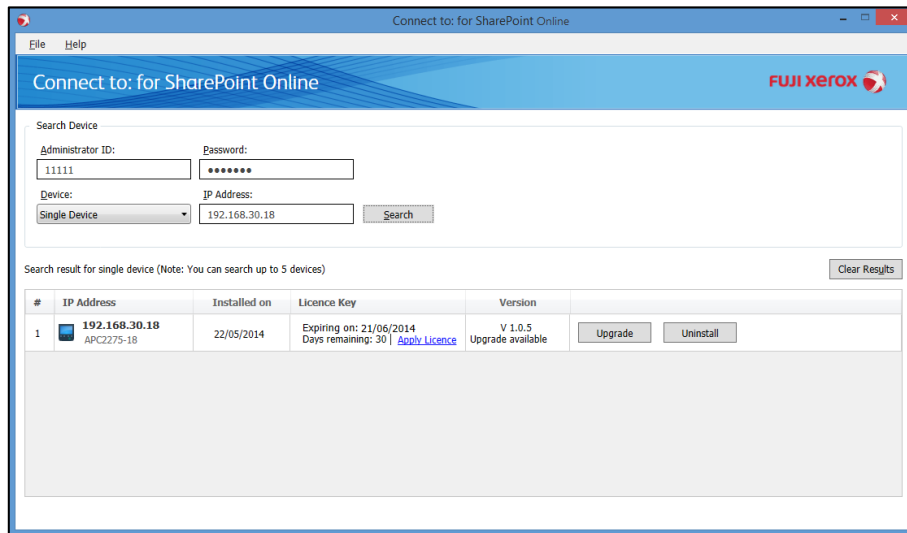

Figure 19

**Note:** If a different version of **installer**, **CSS** or **XCP plug-in** is available for the **Connect to: for SharePoint Online**, the **Upgrade** button is displayed.

2. Click **Upgrade** to update the plug-in and CSS file on the corresponding MFD either to the higher or to the lower version.

# How to Apply Licence for Plug-ins

This section provides information on how to activate a licence for **Connect to:** plug-ins installed on MFDs.

To apply licence for plug-ins on MFDs:

1. Follow the steps explained in [How to Discover MFDs](#) to search the MFDs on which you want to apply licence for the plug-in installed.

The search results screen is displayed:

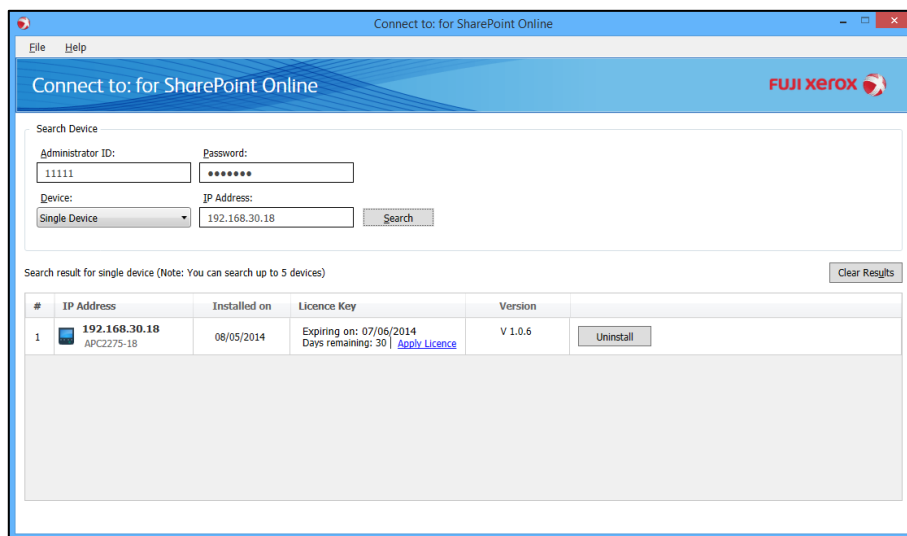

Figure 20

2. Search through the **Licence Key** column to find the MFDs for which the licence either has expired or is in its trial period.
3. The **Apply Licence** hyperlink is displayed for those plug-ins (on the MFDs), whose trial period still exists or has expired. If trial period exists, following information is displayed in the **Licence Key** column:

- **Expiring on:** <date>
- **Days remaining:** <number of days>

If trial period is over, the message **Expired on** <date> is displayed along with **Apply Licence** hyperlink.

4. Click **Apply Licence**.

The following screen is displayed:

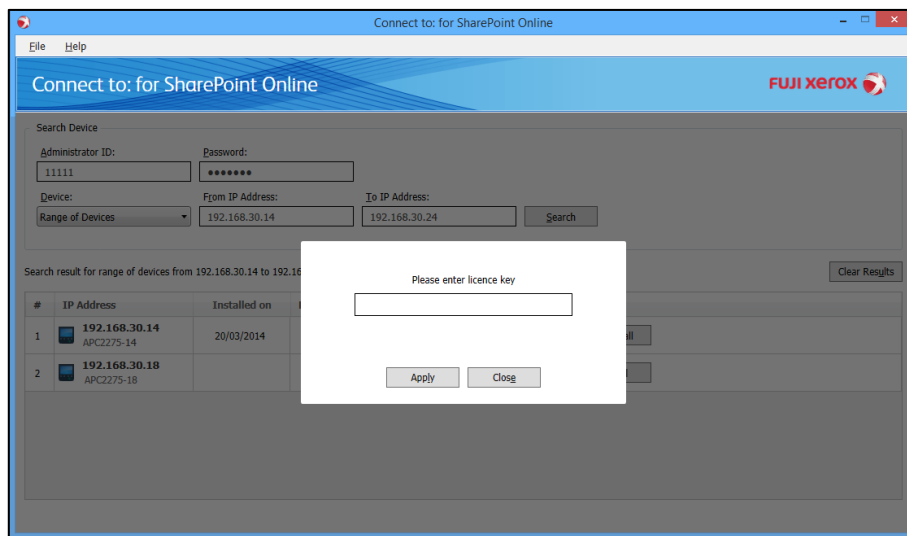

Figure 21

5. Type a valid licence key in the **Please enter licence key** field and click **Apply**.

**Note:** To obtain a perpetual licence for the **Connect to: for SharePoint Online**, please visit the [Fuji Xerox Australia website](#) and follow the prompts under the **Connect to: for SharePoint Online** micro-site.

A confirmation screen like the following is displayed:

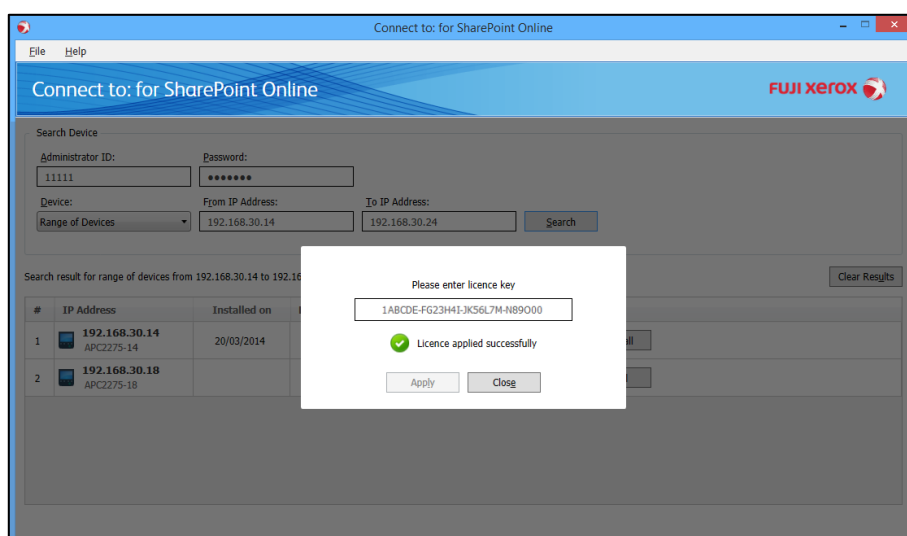

Figure 22

- Click **Close** after the licence is applied.

The associated record is refreshed with the latest licensing information (*Perpetual* in the following screenshot) in the *Licence Key* column.

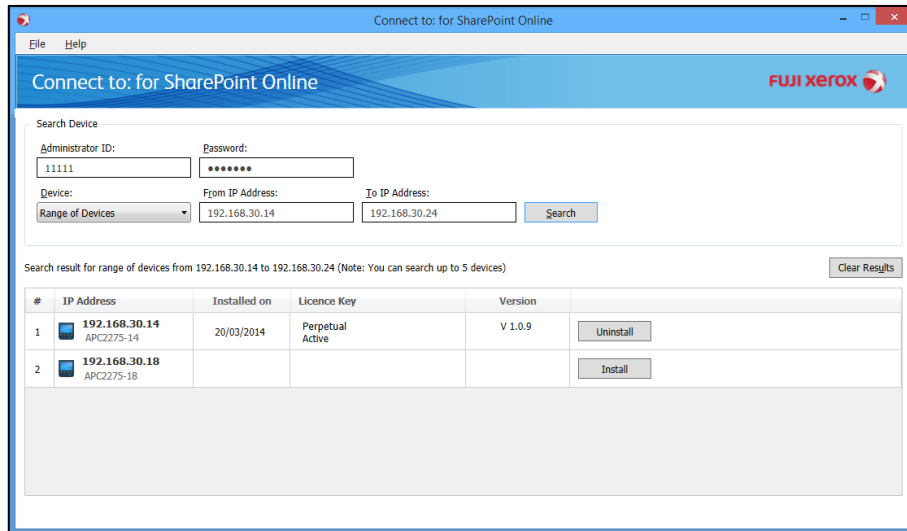

Figure 23

## How to Repair Plug-ins on MFDs

This section provides information on how to repair **Connect to:** plug-ins installed on MFDs.

- If either the plug-in or the CSS files are missing in the MFD, you can see the **Repair** button while discovering it:

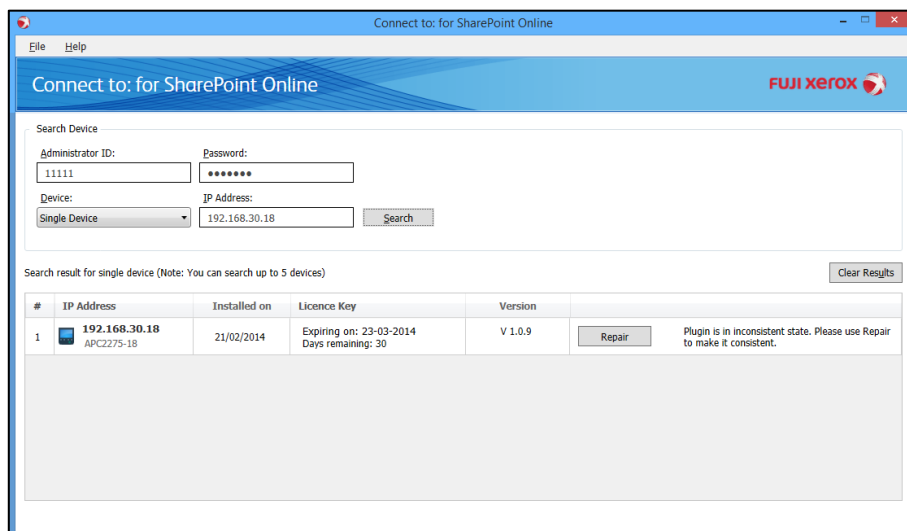

Figure 24

2. Click **Repair** to send the plug-in or the CSS files to a consistent state. (It might take a few minutes to complete this action.)

The following screen is displayed:

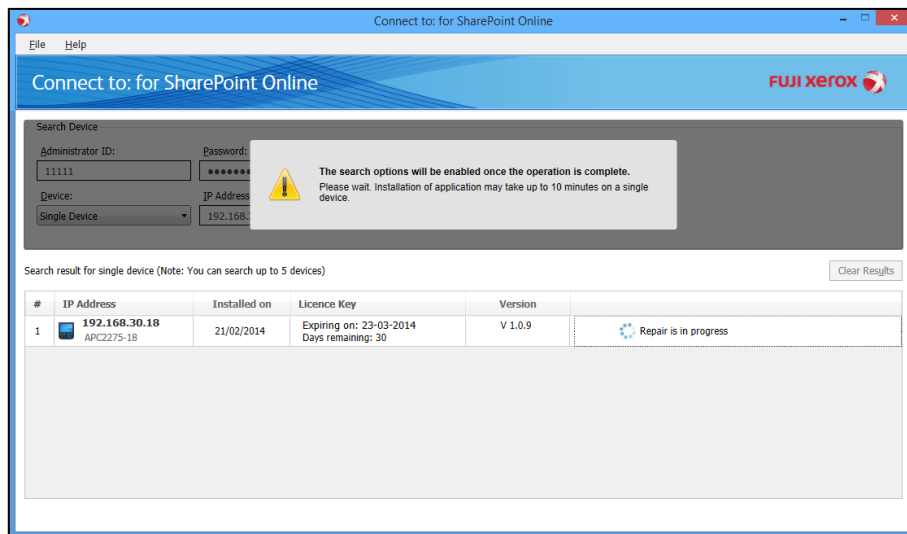

Figure 25

3. After the repair is complete, a confirmation screen like the following is displayed:

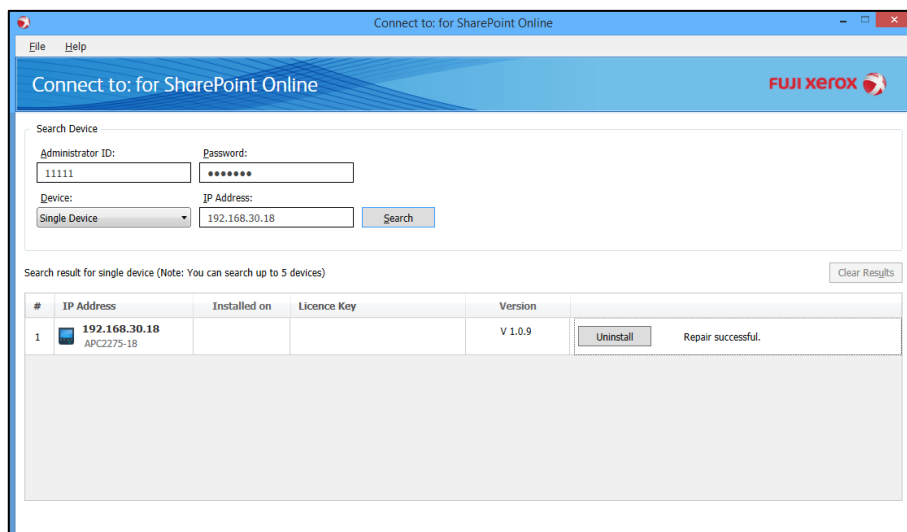

Figure 26

# Troubleshooting

This section lists a few problems that users might face while working with the **Connect to: Installer** for SharePoint Online and their probable solutions.

*Problem: If there are issues related to compatibility, what should I do?*

*Solution:*

Check the SSMI version of the MFD.

For information on how to check the SSMI version of an MFD, refer to [Appendix B](#).

*Problem: If upgrade/install/uninstall fails, what should I do?*

*Solution:*

Restart the MFD and retry the operation. If problem persists, the device might be in error state. Please contact Technical Support for assistance.

*Problem: If applying licence fails, what should I do?*

*Solution:*

Please contact Technical Support to ensure that you have a valid licence.

*Problem: In case of 'Device not found' errors, what should I do?*

*Solution:*

- Check if the FXA-K1SDK.pfx security certificate is installed in Microsoft Management Console.
- Check if the MFD is in the network and accessible by using a web browser to access the MFD's CentreWare Internet Services (CWIS). See [Appendix B](#) for information on how to access MFD's CWIS.
- Check if the proxy settings are enabled for your web browser. If they are enabled, add the MFD IP address in the *Exceptions* list for *Proxy Settings* of the Internet Options.

*Problem: If the application doesn't work, what should I do?*

*Solution:*

Ensure that the security certificates for the application are installed.

*Problem: My trial licence has expired. How should I renew it?*

*Solution:*

Licences available for this application are of two types, *trial* and *perpetual*. A **trial** licence is valid for 30 days and it expires after that period. A **perpetual** licence is valid forever and it never expires.

If your trial licence has expired, you must contact Technical Support for a valid perpetual licence to use the application.

***Problem: If I don't have the Admin rights to an MFD, what does this mean? What should I do?***

***Solution:***

Admin rights are the credentials which are used to do any operation (such as *get plug-in details*, *install plug-in*, *uninstall plug-in* or *upgrade plug-in*) on an MFD. The default admin credentials are:

- Username: 11111
- Password: x-admin

Please contact your System Administrator to get the Admin rights. If required, please contact Technical Support.

***Problem: What should I do when I have started searching for devices but the search results are not displayed?***

***Solution:***

Following might be a few possible reasons:

- Improper credentials provided during search
- Network failure
- Incompatible devices (i.e. SSMI version is not 1.17.2 or higher)
- XCP plug-in is not active

Ensure that the above issues are addressed. If the problem persists, please contact Technical Support.

***Problem: What should I do if I get the message 'Unable to retrieve Plug-in information'?***

***Solution:***

Restart the specific MFD and search again. If problem persists, please contact Technical Support.

***Problem: What should I do if I get the message 'Unable to retrieve Licence information'?***

***Solution:***

This message is displayed when plug-ins are pushed to or removed from the MFD, but the MFDs are yet to reboot for activation or deactivation. So wait for a few minutes and try to search the device again. If problem persists, open the CWIS and check for the state of the plug-in in the MFD.

***Problem: What should I do if I get the message 'System is Locked'?***

***Solution:***

This message is displayed when wrong Administrator ID or Password is entered more than five times consecutively. Please reboot the MFD and enter the correct credentials.

***Problem: What should I do if I get this message 'Unable to retrieve information as Plug-in is in reboot to activate state'?***

***Solution:***

This message is displayed when the plug-ins are pushed to the MFD, but the MFD is yet to reboot for activation. So, open the CWIS and click **Reboot Machine** from the *Status* tab. Alternatively, you can repair the plug-in using the procedure explained in the [How to Repair Plug-ins on MFDs](#) section.

***Problem: What should I do if I get the message 'Unable to retrieve information as Plug-in is in reboot to deactivate state'?***

***Solution:***

This message is displayed when the plug-ins are removed from the MFD but the MFD is yet to reboot for deactivation. So, open the CWIS and click **Reboot Machine** from the *Status* tab. Alternatively, you can repair the plug-in using the procedure explained in the [How to Repair Plug-ins on MFDs](#) section.

***Problem: What should I do if I get the message 'Plug-in Settings option is not enabled on the MFD'?***

***Solution:***

This message is displayed when the plug-in settings are not enabled on the MFD. So enable the plug-in settings through CWIS tool and search the device. For more information on plug-in settings, refer to [Appendix C](#).

***Problem: I have installed the latest version of Connect to: Installer for SharePoint Online on my laptop. During device discovery, the error 'Device not found' message is displayed. What should I do?***

***Solution:***

This might happen if any other application uses the port 15191, which is the default port used by **Connect to: Installer for SharePoint Online**. This default port cannot be modified.

## Appendix A – How to Configure **Connect to:** for SharePoint Online Shortcut on MFD All Services Screen

1. Touch the **Log In / Out** button on the **MFD Control Panel**.

Figure 27

2. Touch the **Log in as Administrator** button.

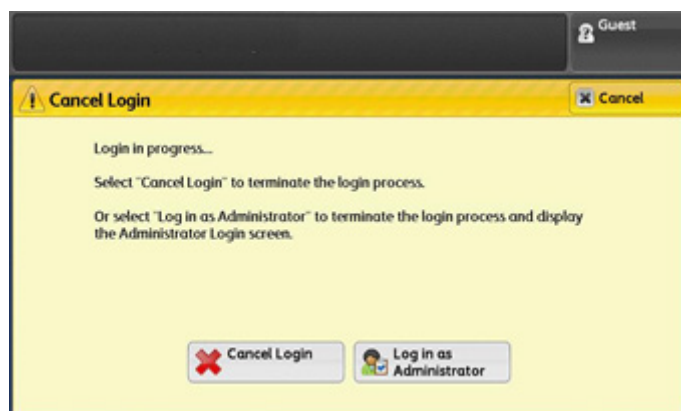

Figure 28

3. If you do not see the screen as shown in *Step 2*, proceed with *Step 4*.

4. The *Log in as System Administrator* dialogue is displayed.

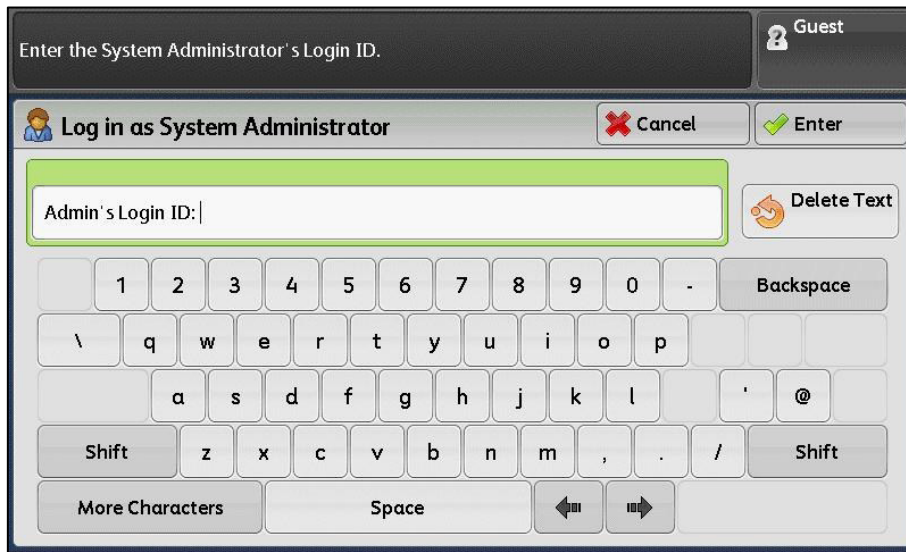

Figure 29

5. Type the **Admin's Login ID** and touch **Enter**.  
The *All Services screen* is displayed with Admin logon.

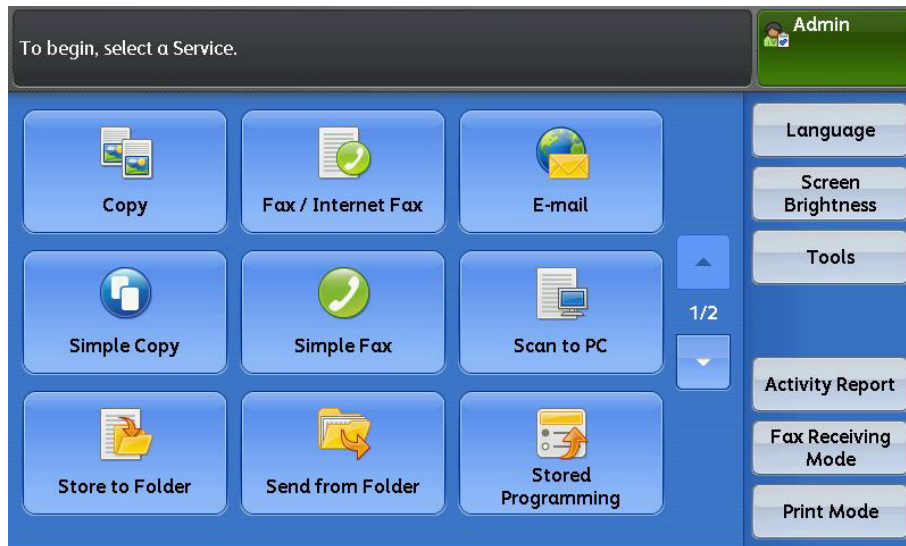

Figure 30

6. Touch the **Tools** button.  
The *Tools* screen is displayed.

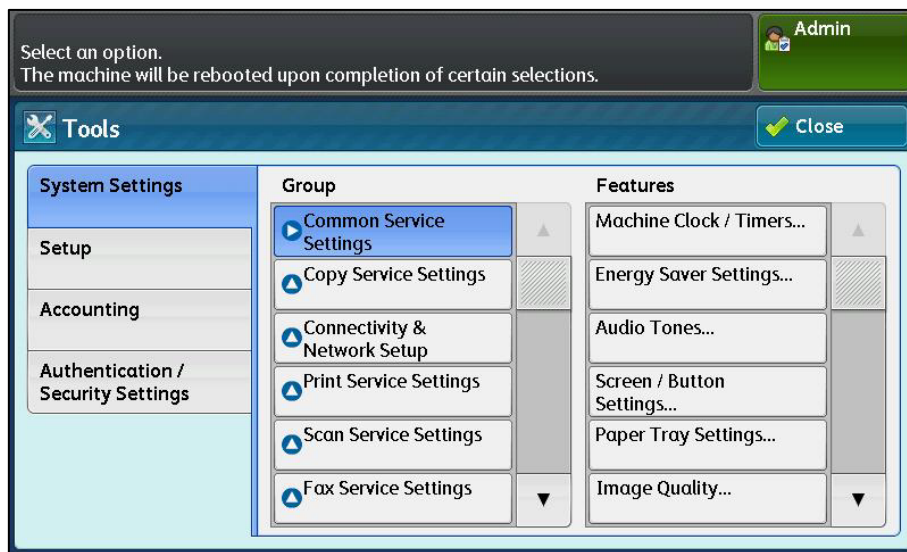

Figure 31

7. From the **Features** menu on the right, touch **Screen/Button Settings....**  
The *Screen / Button Settings* screen is displayed.

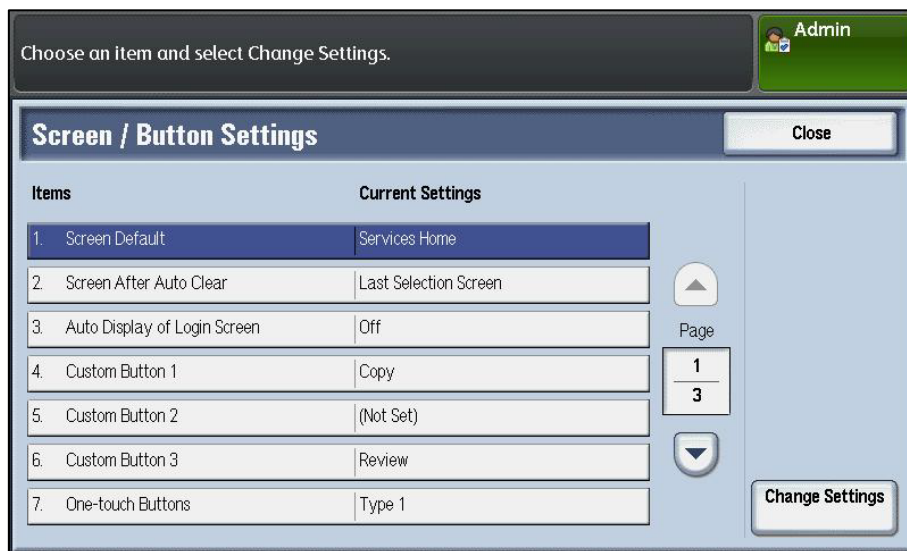

Figure 32

8. Scroll down till you see **Services Home** in the *Items* column and touch it.
  9. Touch **Change Settings**. (Refer to *Figure 32*)
- The *Services Home* screen is displayed.

Figure 33

10. Touch the corresponding button position number where you want the **Connect to: for SharePoint Online** shortcut to be displayed.
11. Scroll down and select **Connect to: for SharePoint Online**.

Figure 34

12. Touch **Save**.

The *Services Home* screen is displayed. (Refer to *Figure 33*.)

13. Touch **Save**.

The *Screen / Button Settings* screen is displayed. (Refer to *Figure 32*.)

14. Touch **Close**.

The *Tools* menu is displayed.

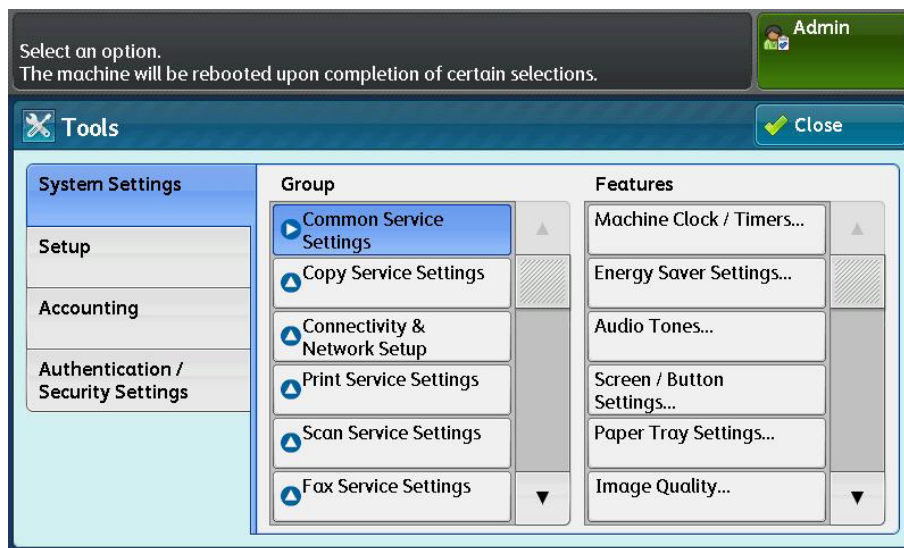

Figure 35

15. Touch **Close**.

The *All Services* screen is displayed. The **Connect to: for SharePoint Online** shortcut is created in the specified position.

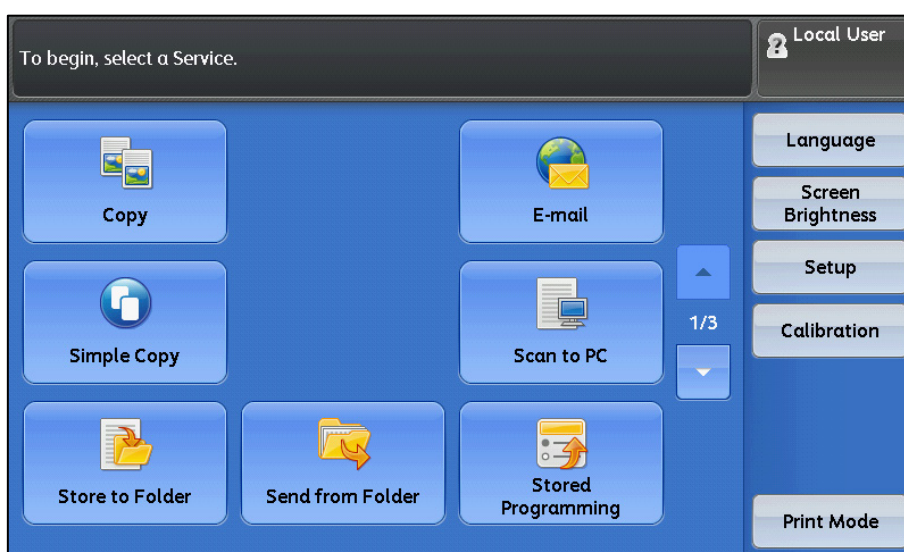

Figure 36

You may need to browse the pages to locate the shortcut.

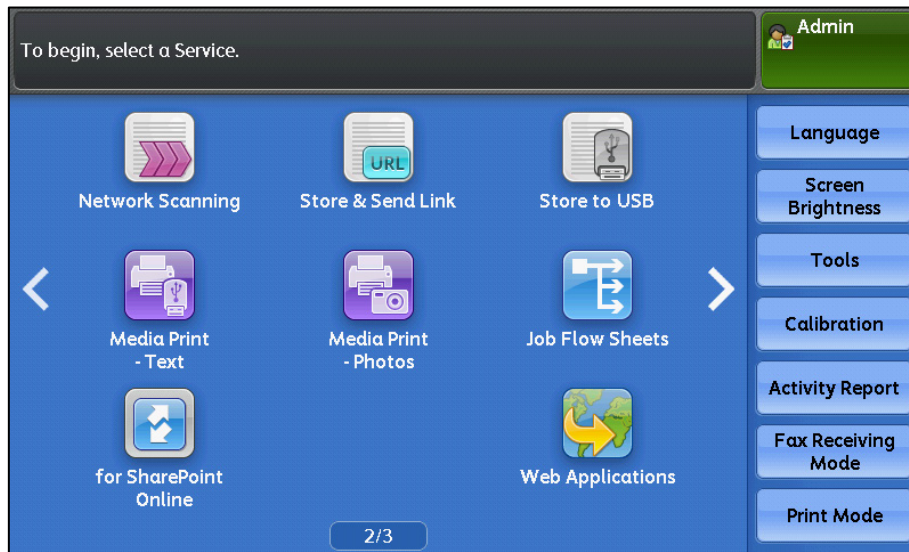

Figure 37

16. Touch the **Log In / Out** button to exit *Admin* mode.

## Appendix B – How to Check the SSMI Version of an MFD

To check the SSMI version of an MFD:

1. Browse the IP address of the MFD on a web browser.
2. Click the **Properties** tab.
3. Click **General Setup** in the left pane and then click **Configuration**.

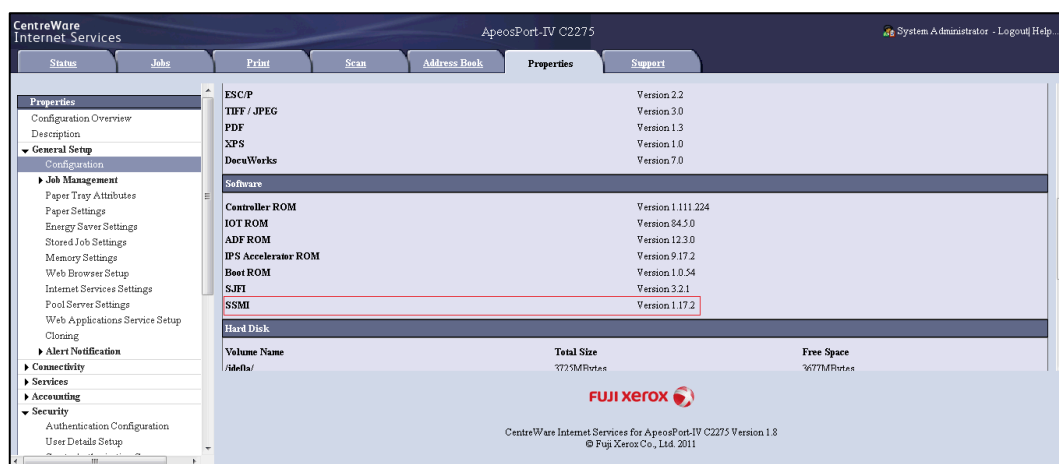

Figure 38

4. Scroll down to the **Software** section.  
You can find the SSMI version details.

## Appendix C – How to Check If XCP Is Activated and Enabled

To check if XCP Plug-in is activated and enabled on the MFD:

1. Browse the IP address of the MFD on a web browser.
2. Click the **Properties** tab.
3. Click **General Setup** in the left pane and then click **Security**.
4. Scroll down and click the **Plug-in Settings** node.

**Note:** The **Plug-in Settings** node is visible only when XCP plug-in is activated.

If the plug-in is enabled, the following screen is displayed with **Enabled** checkbox selected:

Figure 39

## Appendix D – How to Change the Log File Path

To change the log file path:

1. Browse the **Connect to: for SharePoint Online** application installation path.
2. Open the **FXA.OI.ESAC.Installer.exe.config** file with *Notepad*.

You can find the following two instances where the log file path is mentioned:

- C:\Temp\FXA.OI.ESAC.log
  - C:\Temp\K1SDK.log
3. Modify the path as per your requirement and save the file.
